ABOUT ME

Experienced backend software engineer, specializing in designing and implementing product-focused solutions. I'm passionate about getting involved in both business understanding and technical aspects, collaborating with engineering teams and other disciplines.

EXPERIENCE

Senior Software Engineer | Business Automation　　　　*Argentina (Remote)*
Cabify　　　　*Jul 2025 - Present*

- Working in various projects using Go and MySQL.
- Automated manual processes and built agent tools integrating custom solutions in Zendesk.

Senior Software Engineer　　　　*Argentina*
Despegar.com　　　　*Jul 2021- Jul 2025*

- Increased resilience, observability and traceability of the ecosystem by implementing an event-driven architecture, supporting complex business flows.
- Designed a brand-new multi-country checkout solution for the "flight change" flow, enabling key business goals and cutting out invoice-related costs.
- Improved the client-addressed communications development process. My new solution allows the creation of complex emails in about 6 hours, over 3+ days on the previous app.
- Mentored and coached developers in the company's training and onboarding program.
- Promoted and implemented automation processes for key applications regarding quality and testing.
- Reduced support time with internal tools for quick issue-solving, cutting the time needed to diagnose the most common inquiries by up to 70%
- Collaborated in developing an internal company library to execute async information flows in Scala applications.
- Integrated a conversational AI solution into the "changes" business flow.

Cofounder　　　　*Argentina*
WarpingCube　　　　*Jun 2018 - Jul 2021*

- Built a multi-tenant management platform for sports organizations, used by the Montevideo City Torque football club.
- Designed an e-learning platform used to manage 150+ courses daily.
- Facilitated a dynamic environment for our clients' business development through custom features and joint work.
- Budgeted projects and business proposals for clients based in the USA, Argentina, and Uruguay.
